Weather Key Points

Regional Operations Center

Western Region

Monday, August 15

- Monsoonal moisture will continue to bring isolated to scattered showers and thunderstorms across the desert southeast areas this week. Isolated chances will spread northwest through the week, with showers and thunderstorms returning to the central Sierra and eventually the far northern mountains by midweek.
 - Some storms may produce locally heavy rainfall.
- Locally elevated fire weather conditions persist across California with continued warm and locally breezy conditions, especially closer to the mountains and foothills.
- Temperatures will increase through at least the first half of next week, with areas of moderate to high heat risk across the Central Valley Tuesday through Friday.
